PMD Snack Food Equipment:-

Nik Nak Production Plant

Nik Nak Extruder:- Model C-450

This hard extrusion machine is designed to produce crunchy cooked snacks from a maize grit raw material. The process is based on horizontal extrusion against a flange from where the soft product falls directly on to a belt. This output is then quick fried, flavoured and packed for market. PMD offers a semi automatic system and fully automatic system.

Model C – 450 Nik Nak Extruder for output of up to 80Kg per hour of raw collects

Machine Complete with:-

- * Stainless Steel grit hopper for 50 to 60 Kg of maize grits.
- * Adjustable rotor end for product variation
- * Feed Motor geared drive with bearing housing oil lubricated
- * Stainless Steel product discharge Chute
- * IP 55, enclosed electric control panel
- * Electric specification : 380 Volt, 3 Phase, 50 Hz
- * Main drive motor : 11 Kw
- * Feed motor: 2.2Kw
- * Paint specification : Powder coated, white

Basic Process of Producing Nik Naks

- * Mix maize grits
- * Extruded
- * Fry
- * Transfer to coating pan for flavouring
- * Bagging

Semi Auto Nik Nak Plant

- Extruder
- Bagging Stand
- Coating Pan

Fully Auto Nik Nak Plant
